- Problem-Solving
- Debugging

WORK EXPERIENCE

Student

Web Developer

2025 - Present

Since 2024, I have been working as a freelance programmer, developing and maintaining web applications using modern technologies. I specialize in both front-end and back-end development, creating responsive and user-friendly interfaces with HTML, CSS, JavaScript, Bootstrap, and Tailwind CSS. I also build dynamic systems using PHP frameworks such as CodeIgniter 4 and Laravel, and integrate Firebase for real-time functionality. Additionally, I have experience connecting Arduino-based hardware systems with web applications, delivering efficient and customized solutions for various projects.
